STATUS: ● AVAILABLE — new contracts · freelance · remote OK

FR · Brittany | EN fluent · 中文 | born 02.03.1995

[01] PROFILE

Full stack developer, 8 years of experience across web, mobile (iOS & Android) and desktop apps. Specialized in Angular, Node.js and Flutter, I take a project end to end: architecture, backend, APIs, responsive interfaces, production. Also a defense / aerospace background in C++/Qt at Silicom (CEA, Airbus).

[02] EXPERIENCE

- Freelance Developer

web · mobile · desktop

02/2017 — present
- > Agora Nova

Flutter · Dart · Bun

Mobile app + REST API for a public-debate social network: verified multi-role accounts, posts, polls, hashtags, moderation. GDPR-compliant FR hosting, CI/CD.
- > SNCF · DigiDoc+

Angular · TS · RxJS

Front-end rebuild of the internal documentary platform delivering rail prescription texts (regulations, safety instructions) to every railway agent. Faceted full-text search (Elasticsearch), classification-based navigation, favorites. Agile collaboration with the back-end and business teams.
- > Kiwidiag · kiwidiag.com

Node · GraphQL · PostgreSQL

Backend of the marketplace for mandatory property diagnostics (DPE, asbestos, lead, gas...): multi-role accounts, geolocated booking of certified surveyors, Stripe payments, Twilio SMS.
- > Leroy Merlin

Angular · Node.js

Front-end development and integration on the site.
- > Other work

Backend of a staffing site (capainterim.com); image platform for a humanitarian NGO; wiring-guidance software (C# · WPF); scientific-PDF extractor (C++ · Qt).

- C++/Qt Developer — Silicom

defense · aerospace

12/2020 — 05/2023
- > CEA

C++ · Qt

New features and maintenance on three scientific tools: seismic / infrasound / hydroacoustic signal analysis for nuclear monitoring (Workspace), seismic-network station tracking (Diva), health impact of pollutant releases (Ceres).
- > Airbus Defence & Space

C++ · Qt

New features for a secure communication software over hostile wireless networks (Magellan).

- Engineering Internships

defense · aerospace · embedded

2016 — 2020
- > Thales · La Ruche

C# · C

Drone detection in Unity + radar simulator (6 months).
- > Sogitec · Dassault

C++

Raytracing/rasterization rendering, flight simulation (5 months).
- > R&D Tech France

C · C++

Embedded dev: lasers, drone parachute, robot arm (7 months).

[03] APPS & PROJECTS

- > Dian Dian · 点点

Flutter · Express · TS · Postgres

Visual year-tracking app (iOS / Android): Flutter + Express/Postgres, WebSocket, published & monetized (RevenueCat, AdMob), self-hosted on Docker.
- > Algo Trading Platform

Bun · TS · Hono · Postgres · Docker

Crypto algo-trading platform (spot + futures): strategies written in TypeScript, identical in backtest / paper / live. High-fidelity backtester, walk-forward optimizer, live bots with risk guards, self-hosted (Docker, CI/CD).
- > Path Tracing Engine

C++ · Qt · OpenGL

Photorealistic 3D rendering engine from scratch, multithreaded: .obj/.mtl, material editor, AABB trees, OpenGL preview — github.com/charlespolart/Pathtracing.
